

# INNOVATION On Demand

Real-time intelligence, smart policy enforcement,  
guardrails for the cloud.

Microsoft  
Partner

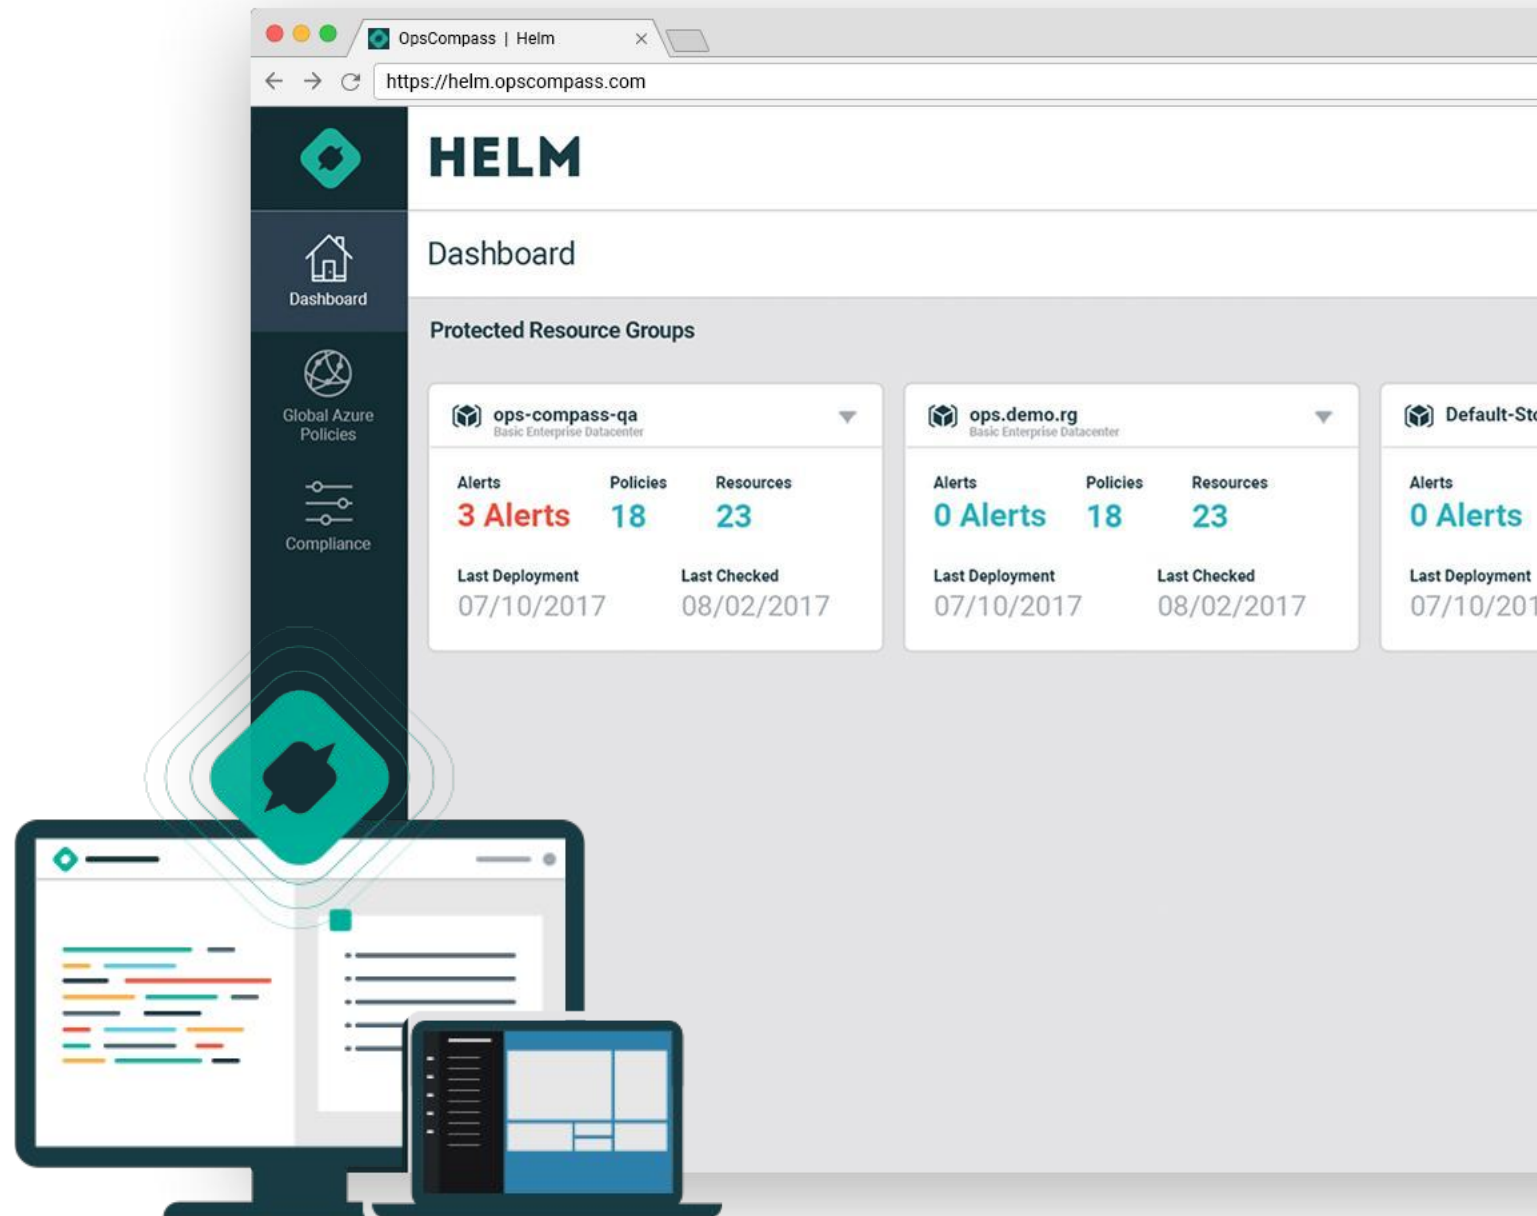

Gold Cloud Platform

# OpsCompass Helm

SaaS based service that enables organizations to:

- Continuous configuration drift detection
- Easily capture configuration baselines
- Automate deployment of key policy and infrastructure components (Blueprints)
- Operationalize Cloud Capabilities
- Compliance Analysis

## Solutions Libraries

- Consistent cloud provisioning with correct policy, governance, and site recovery built-in every time.
- Flexibility of deploying a specific, hardened application stack with policy guardrails built-in OR an application-ready environment where users can deploy to it via the external tools or the portal with guardrails already in place and Helm protecting the environment.
- Enable less experienced staff to execute complex build tasks in the cloud.
- Reduce risk by limiting your environments to "t-shirt sized", pre-defined deployment solutions with all of your requirements and policies built-in.

```
1 {
2   "$schema":

23        '/subscriptions/c65c08a7-5cea-4cfc-b326-91579369d912/resourceGroups/dev-ops-days/providers/Microsoft.Network/virtualNetworks/dev-ops-vnet'.",
24    }
25  ]
26 }
```

# OpsCompass - Control

## Consistent and Automated Policy

- Detect risky configuration drift in real time
- Inject policies into your cloud fabric
- Operationalize cloud ops
- Automated deployment blueprints
- Compliant infrastructure

“60% of enterprises that implement appropriate cloud visibility and controls – experience 1/3 fewer security failures.”  
- Gartner Security Summit, June 2017

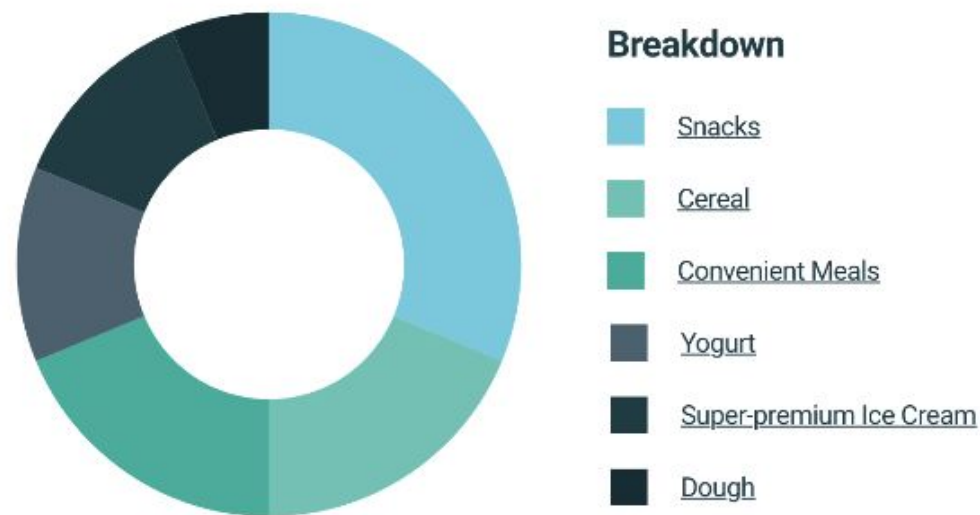

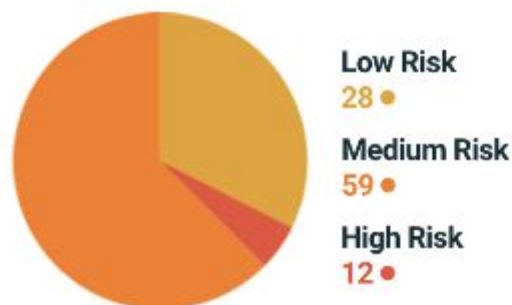

# OpsCompass - Visibility

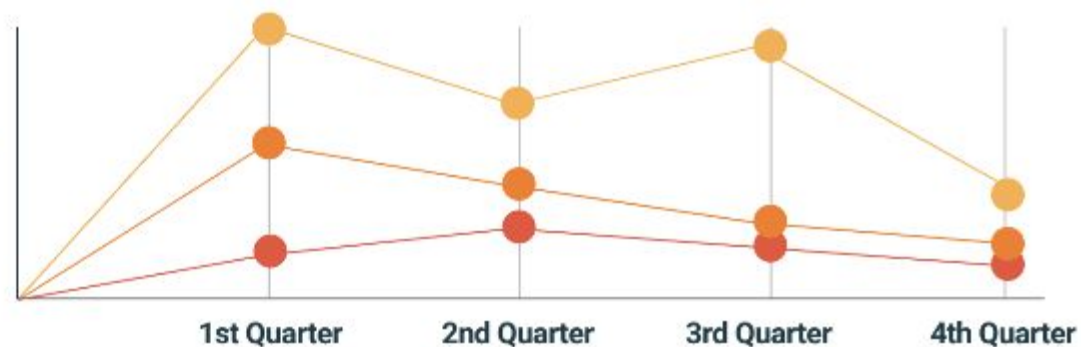

- Visibility of Cost, Compliance, and Security
- View status the way you view your business
- Per application reporting

Ascent Solutions

Serious IT  
Transformation

# Ascent Solutions Background & Key Differentiators

- About Ascent:
  - Ascent's unique method of incorporating cybersecurity into everything we do (Cloud First, Security Everywhere) has enabled Ascent to become the premier cloud and cybersecurity consulting organization. Through extensive training, and experience in cyber warfare we work with our clients to protect their most critical vulnerability: their identities.
- Ascent Key Differentiators:
  - Top Tier Microsoft Partner – Gold Level
    - Cloud Platform
    - Enterprise Mobility and Management
    - Windows and Devices
  - Large Program Management experience with similar technology at large enterprises
  - Only 1 of 2 companies worldwide **ever** to be trained by Microsoft in their Identity Security program (ESAE for Credential Theft Mitigation)
  - Deep connections within Microsoft: Product Engineering, Executive, Partner Leadership, Field Level – Largest U.S. Modern Workplace Solution Provider
  - Partner resources in Eastern Europe and India for time zone work and cost savings

# About Ascent Solutions

# Ascent Cloud Ready™

- Azure Architecture, Governance, and Planning
- Tier Zero Networking
- Workload Design Assistance
- Deployment Support
- Implementation
  - Tier Zero network deployment
  - Ops Compass Policy Implementation
  - Training
- Application Modernization
  - Secure DevOps
  - App Modernization Migrations
  - NoOS, FPGA

🎉 Party! 🎉

When: Tonight

Where: The Slowdown

Drinks: Free 🍻

RSVP: [techomaha.com/party](https://techomaha.com/party)
